

THE COMPLETE CYBERSECURITY GUIDE

FOR HOME HEALTHCARE AGENCIES

Protecting your agency, your data, and your reputation with proactive IT, cybersecurity, and live human support.

Home Healthcare Agencies rely on technology every day to manage scheduling, payroll, referrals, billing, communications, documents, and office operations.

A cybersecurity incident can disrupt far more than computers. It can affect productivity, compliance, employee trust, referral relationships, and business continuity.

WHAT'S AT RISK?

-  PHI and sensitive records
-  Payroll and banking information
-  Employee documents
-  Referral and billing data
-  Email communications
-  Business reputation
-  Daily operations

WHY HOME HEALTHCARE CYBERSECURITY MATTERS

Remote users and mobile devices increase exposure

Microsoft 365 and cloud systems need proper security

Payroll, billing, referral, and employee data must be protected

Cyber insurance requirements are increasing

Business continuity depends on secure, reliable systems

WHAT EVERY HOME HEALTHCARE AGENCY SHOULD HAVE IN PLACE

- ✓ Multi-Factor Authentication (MFA)
- ✓ Secured Microsoft 365
- ✓ Endpoint Detection & Response (EDR)
- ✓ Email security
- ✓ Reliable, tested backups
- ✓ Patch management
- ✓ Mobile device controls
- ✓ Employee cybersecurity awareness training
- ✓ Access controls
- ✓ Business continuity planning
- ✓ Disaster recovery planning
- ✓ Professional IT monitoring
